

Natural SUDOKU

April 27

I've used natural objects you are likely to find most places. Find 3 more of each natural item listed below,

- Dandelion leaf
- feather
- daisy flower
- leaf from a tree.

Fill each blank space with your one of your items.

The normal SUDOKU rules apply - only one of each item in each quarter of the grid and only one of each item in each row and column.

If you can't find these natural objects, collect 4 of each natural object you can find and replace the ones in the grid with your own.

Natural SUDOKU

These are plain sheets for you to put your own items in.

Collect your 4 natural items (4 of each) and use the colours to position the items in the correct positions before you start to solve the puzzle.

GOOD LUCK!
