

The Length of My Shadow

Use this sheet to record the length of your shadow at midday and see how it changes over the month and later months. Record the measurement on as many days as you can for best results. The challenge is to get enough sunny days to be able to take measurements.

Feb 10 and 27

Can you fill in the blocks to make a bar graph? If you record your results throughout the year, the graph will show you what happens to your shadow in picture form.

TIP Remember to stand in the same place each time you take the measurement. Choose your unit of measurement and fill in the units on the left.

DATES - fill in the dates when you gather the readings. Take a couple of readings each month to see the change throughout the year.
